Problems with credit card payment

- Contact your card issuer to make sure everything is all right with your card settings.
- The system might ask you to verify your payment with your online bank codes or a specific password from your card issuer. If you don't have these codes or password, please contact the card issuer.
- If you have cancelled the payment accidentally or the payment is denied, don't try making it again immediately. Please wait for a while (about one hour) and try again after that. The card processor may deny the payment for safety reasons if it is tried again right away. If the payment is still denied, please contact mikko.pajunen@jkl.fi to ask service provider to reset your reservation and try again after that.
